Brazilian fresh produce, supplied against a specification

Trivalli supplies importers, wholesalers and distributors in Europe with Brazilian fresh produce, programme by programme. Each programme is built around a named growing unit and packing house, priced against a closed specification and shipped with the documentation the destination market requires.

One specification. Named certified origin. Full traceability from origin to shipment.

How we work

Selection

Every programme starts with the choice of the growing unit and the packing house. We supply only from growing units certified GLOBALG.A.P. and packing houses certified BRCGS or IFS.

Process

Harvest at the agreed maturity, packing against the closed specification and inspection before loading.

Standards

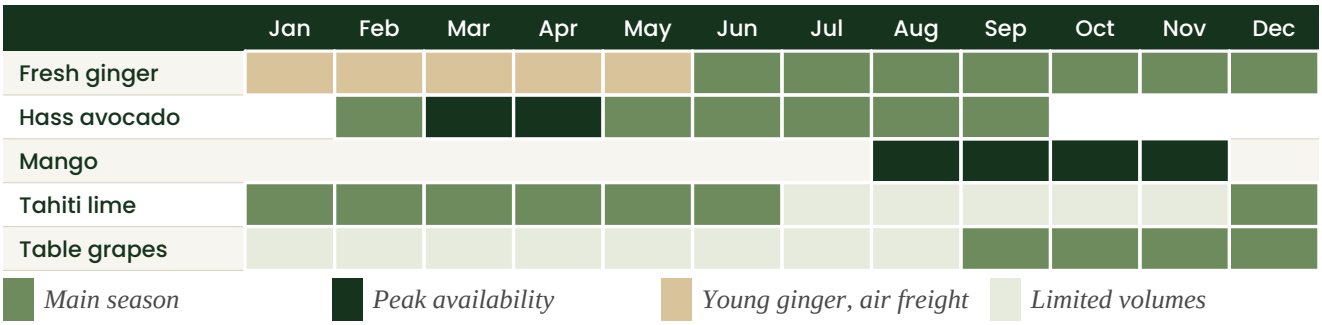

Phytosanitary certificate issued by the Brazilian Ministry of Agriculture (MAPA, ISPM 12), EU maximum residue levels and the applicable EU marketing requirements for each product.

Traceability

Every carton carries a lot code leading back to the growing unit and the packing house. Certificates are issued in the name of the unit.

Commercial approach. Prices are quoted firm against a defined enquiry (product, size, pack, volume and shipment window) and carry a stated validity, because the value of fresh produce follows the harvest cycle and international demand. The EU–Mercosur interim trade agreement has applied provisionally since 1 May 2026.

Supply calendar

Windows show the commercial export season; volumes and varieties are confirmed per enquiry. Availability varies by variety.

Certification and compliance

- **Growing unit:** GLOBALG.A.P. certified. We do not supply from uncertified units.
- **Packing house:** BRCGS or IFS certified.
- **Social compliance:** GRASP or SMETA documentation of the assigned unit, available on request.
- **Residues:** EU maximum residue levels (Regulation (EC) No 396/2005). Stricter buyer specifications on request.
- **Certificates:** scheme, number and validity, in the name of the assigned unit, supplied with each programme.

Fresh Ginger

Zingiber officinale · HS 0910.11 · Origin: Southeast Brazil

Cured, washed and graded ginger rhizome for the European wholesale and retail trade: firm, dry, light-brown skin, pale-yellow flesh, and marked pungency and aroma. A living fresh product shipped chilled, neither dried ginger nor a spice. The mature cured crop runs from mid-June to December and suits sea freight; early-season young ginger, from January to May, travels by air and is quoted separately.

Type	Brazilian Giant
Quality	Export quality. Clean, firm, dry, cured skin; free from mould, sprouting and excess soil
Sizes	150 g+ per piece. Uniform within each carton
Packing	Carton of 13.6 kg net (30 lb), new, clean, food-grade. 14 kg net on request
Palletisation	60 to 70 cartons per pallet, on 1.00 × 1.20 m heat-treated pallets marked ISPM 15
Container loading	22 to 24 pallets, 1,440 to 1,560 cartons, about 19.6 to 21.2 t net per 40' reefer container
Supply window	Mature cured ginger from mid-June to December. Young ginger from January to May, by air
EU plant health	Supplied to the EU from production sites and packing houses that meet the EU import requirements for fresh ginger, including a registered production site and official inspection
Documents	Phytosanitary certificate (MAPA, ISPM 12) · certificates of the assigned unit · analyses per shipment

Hass Avocado

Persea americana · cv. Hass · HS 0804.40 · Origin: Southeast Brazil (SP, MG)

Hass avocado for the European market: firm, creamy, fibre-free pulp with a rich, nutty flavour; the skin turns from dark green to purplish-black as it ripens. Brazil's Hass production is expanding, with a supply window that complements the main Northern Hemisphere origins.

Variety	Hass
Quality	Class I to the EU marketing standard (UNECE FFV-42)
Maturity	Harvest maturity of at least 21% dry matter for our Hass programme
Packing	4 kg net carton (4.6 kg gross) for counts 12 to 24 (Codex CXS 197; Northern Europe mainly 16 to 18), with no more than 25 g difference between the smallest and largest fruit. 10 kg carton on request
Supply window	February to September, with peak volumes in March and April
Labelling	Product, variety, size code, packer, origin and traceability code on every carton
Documents	Phytosanitary certificate (MAPA, ISPM 12) · certificates of the assigned unit · analyses per shipment
Preferential origin	EU–Mercosur rules apply where the eligibility requirements are met

Seasonal programmes, quoted on request

The products below are quoted per enquiry. Before an offer is made, each programme is confirmed against a closed specification, a shipment window and an assigned growing unit, which is certified GLOBALG.A.P.

	Product	Varieties	Indicative packing and sizes	Supply window
	**Mango** HS 0804.50	Palmer, Tommy Atkins, Keitt, Kent	Palmer, Tommy Atkins, Keitt: 4 kg carton, sizes 6–12. Kent: 6 kg carton, sizes 10–12	Peak August to November; other windows by variety and programme
	**Tahiti lime** HS 0805.50	Tahiti	4.5 kg carton, sizes 36–60	Main December to June; limited July to November
	**Table grapes** HS 0806.10	Autumn Crisp, Sweet Globe, ARRA 15	8.2 kg (10 × 820 g bags) or punnet formats of 3.6–6 kg	Main export window September to December; limited volumes other months, on request, by variety

Also available on request: papaya, sweet passion fruit and dragon fruit.

Indicative formats. Varieties, volumes and windows are confirmed per enquiry.

Why we quote per enquiry

- A firm price requires a closed specification: variety, size, pack, volume and shipment window.
- It allows us to assign the right growing unit and give you its own certificates rather than a generic list.

From Brazil to your market

Built around your programme. Tell us the product, specification, volume and destination. We assign the appropriate certified growing unit and packing house and return a firm offer against the agreed specification and shipment window.

From enquiry to shipment

01
